## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-23, drawn to apparatus for positioning back-up pins on a support plate, classified in class 29, subclass 739.
  - II. Claims 24-28, drawn to a back-up pin, classified in class 29, subclass 744.
  - III. Claims 29-35, drawn to a method of positioning back-up pins, classified in class 29, subclass 832.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the invention I as claimed does not require the particulars back-up pin wherein an upper surface and lower surface portions being planar and magnetize characteristic etc. as required by invention II. The subcombination has separate utility such as for using in mounting process other than invention I.
3. Inventions Group III and Groups I-II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this

Art Unit: 3729

case the invention of Group III the scanning step can be practiced by another materially different apparatus such as infrared scanner; or the step of transferring or position can be practiced by hand or substrate holder or jig, etc.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for Group I or II is not required for Group III and vice versa, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Hyun Jong Park on October 24, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
